BARDEN

Vacancy
Applications Developer

We're looking for a new applications developer to join our expanding IT team. You would be supporting existing systems and applications, replacing some of those and designing new solutions from the ground up to ensure the business continues to leverage technology to evolve and grow.

The right candidate will be multi-talented and by the end of their training be able to complete the following tasks:

- Support existing solutions and applications written by in house developers.
- Support users in their standard day to day activities.
- Work on new projects both as a developer and sometimes the project lead.
- Enhance the current Datawarehouse to facilitate improved reporting and business intelligence.
- Bring passion and enthusiasm to the team championing new technologies and ideas.

The ideal candidate would have:

- A degree in Computer Science (or similar) or 3 years relevant experience
- Experience of languages such as C# .NET, Javascript, SQL Server
- Experience with methodologies such as Agile Development
- Experience of .NET MVC and web app creation

To apply for this role, please submit your CV and covering letter to Wendy Matthews, HR Department, or via email at
w.mattthews@bardenbearings.co.uk
Closing date: 11th September 2020
